
Socala - The Social Calendar

— Ben Romano, Bryan Anderson, —
CJ Guttormsson

Summary

- Social calendar app
- Integrated with Google Calendar
- Allows setting friends and finding common time with them

Features That Made It And Didn't

Completed

- Google Calendar integration
- Finding common time
- Privacy levels on events

Abandoned

- Facebook/other social media platform integration
- Finding nearby events
- RSVP (?)
- Recurring events

Live Demo

Lessons Learned

- Google APIs and OAuth are hard
 - Multiple types of tokens have to be juggled
- Our core algorithm was tricky to implement
- Recurring events are complicated
